- MASTerMind EX Services 6.46.01 and later

App Versions:

- Android 2.0.2
- iOS 2.0.2

October 2020

Included in this release are:

- Security Improvements
 - o App Switcher Privacy – Screen content no longer displays when switching apps.
- Bug Fixes and Other Improvements
 - o Added a space between address 1 and 2.
 - o Back navigation arrow tappable area increased for improved navigation.
 - o Improved Set New Password layout.
 - o iOS background refresh improvements.
 - o System test improvements including honoring System Test Category duration limits.
 - o Login and Biometric screen improvements.
 - o iOS 14 compatibility improvements.

- Additional performance and stability improvements.

Applies to:

- Android and iOS Platforms
- MASterMind Business and Monitoring Database 6.46.01 and later
- MASterMind EX Services 6.46.01 and later

App Versions:

- Android 2.0.1
- iOS 2.0.1

Additional notes:

- It is recommended to keep devices up to date with the latest platform versions to ensure maximum compatibility and security.
- Although MASmobile will work against 6.44.05 services, the services must be upgraded to 6.46.01 for the default test duration to be fixed.
- Attention iOS 14.0 and 14.0.1 Users: Due to a bug in iOS, scrolling may not be smooth. This bug was not observed in 14.1.
