- Includes 1st year cellular service (\$144 value)

It's like getting the communicator for free, with no rebate hassle!

AND

For each account using a CLSS Pathway, get 1 year monitoring services from us for free.

Industry-Leading Communicator Features:

- **LTE-CAT-M1 is designed on 5G spectrum**, which maximizes building penetration and service life. Eliminate the cost of installing an external antenna.
- **Dual SIM** AT&T and Verizon. Reduce inventory carrying costs, with no need to carry multiple units. The CLSS Pathway automatically selects the best network.
- **Dual path** IP and cellular communication capable

Industry-First Software Capabilities:

- **Test automation and report generation:** *CLSS CheckPoint* allows you to deliver professional test reports before leaving your customer's premise.
- **Real-time alerts:** *CLSS Site Manager* provides a "bird's eye" view of all your accounts, enabling you to diagnose before dispatch. Reduce unnecessary trips & improve your first-time fix rate.
- **Connect to your customers:** *CLSS Facility Manager* provides your end users with access to asset information across multiple sites, and real-time event alerts via browser or mobile app.

These powerful new CLSS Pathways are available to order now! Please contact your local ADI or Anixter branch for ordering and pricing information.

**MSRP of \$250. \$150 promotional price available for a limited time.*
