

TAKE CONTROL of Your Fire Alarm Communication

Move your customers away from POTS!

Lower customers'
costs

1. **Customers are paying more for less**, with the phone company charging an average \$150-400 for 2 POTS lines on a monitored site!

Reduce needless
service calls

2. **Reduce your dispatch rate**. Alarm communication over POTS lines is among the top contributors of nuisance alarms!

Triple your RMR
per account

3. **Takeover the phone company's recurring fees**. Dealers who monitor with cellular and IP charge \$75-150, but can only charge \$25-50 when the POTS is used!

Grow your business! Over **2 million** accounts are still monitored by POTS lines!

The CLSS Pathway Your Path to Converting POTS Accounts!

We are partnering with Honeywell to support you in this campaign and bring you **industry-first capabilities**:

- | | |
|--|---|
| <ul style="list-style-type: none"> ▪ Simplify your communicator inventory ▪ Automatically select the best cellular network | <ul style="list-style-type: none"> ✓ Dual SIM support for AT&T and Verizon networks ✓ Dual path IP and cellular communication |
| <ul style="list-style-type: none"> ▪ Take advantage of 5G spectrum longevity ▪ Reduce install costs by avoiding external antennas in most places | <ul style="list-style-type: none"> ✓ LTE-CAT-M1 designed on 5G spectrum maximizes building penetration and service life |
| <ul style="list-style-type: none"> ▪ Improve first-time fix rate and reduce unnecessary trips ▪ Automate inspection report generation | <ul style="list-style-type: none"> ✓ Real-time detailed alerts in web and mobile app ✓ Test & inspection software |
